

Immunological Laboratory techniques

(Scientific trip to the Central Lab-Tikrit university)

Lecture 5

Tikrit University
College of Veterinary Medicine
Department of Microbiology

Muthanna A. Sultan, B.V.M.S., M.Sc, Ph.D.
Biomedical sciences-Immunology & Microbiology

Scientific reports

- 1- A trip was made for the Junior students to the central lab of Tikrit university.
- 2- The students were watching different molecular-Immunological techniques and the run f these techniques by using an associated kits by the lab's team .
- 3- The techniques were include ELISA, PCR, and Electrophoresis.
- 4- Students were required to submit reports about these techniques through the information that they have had received during their visit .
- 5-An exam will be applied for the students about these techniques .

Best
Wishes!

The image features the phrase "Best Wishes!" written in a bold, black, cursive script. The text is set against a white, slightly tilted rectangular background. The word "Best" is on the top line, and "Wishes!" is on the bottom line. The letters are thick and have a slight shadow effect. Several small, five-pointed gold stars are scattered around the text, particularly around the word "Best". A long, sweeping, black flourish extends from the bottom of the word "Wishes" across the width of the text.
